

Financial Technology Integrators, LLC Announces Upgrades to Investor'sView™

FTI, LLC Adds Performance Measurement, additional Reporting and Trading Functionality to Investor'sView™

Wayne, Pennsylvania, June 15, 2007 – Financial Technology Integrators, LLC announces the release of enhancements for Quarter 2, 2007 that enrich the Reporting and Regulatory Compliance within Investor'sView™. Investor'sView™ is used by over 100 firms and is a leading industry online portfolio management system that analyzes your client portfolios to: create trades using what-if scenarios; purchase and sell a single security across accounts; rebalance portfolios to investment models; generate reports or report presentation packages; and centralize compliance review procedures.

Significant enhancements include the following:

- **Administration** – User Profile functionality has been enhanced to allow for the use of four separate Profile views.
- **Compliance** - The ability to scroll from an account Review to another without going back to the list of reviews.
- **Compliance** - The Review Template will now include an indicator if any Excluded Assets are contained within an account.
- **Reporting** – Policy Lists – The ability to convert the list to a .PDF format is now available.
- **Reporting** – Equity Sector Detail Report – Further defined within it's description to 'Total Equity Sectors'.
- **Reporting** – Account Groups – When running reports for groups of accounts, the ability to have the report display by Account Number order is now available.
- **Reporting** – Minor Allocation Report – This report is now sorted by Asset Class, Minor Class.
- **Reporting** – Equity by Minor Class Report – This report is now sorted by Minor Class Description.

In addition there have been enhancements made 'behind the scenes' to increase the speed and efficiency of Investor'sView™ as well as to a few of our already available reports and user modules. We hope that you will find these enhancements very valuable.

Thank you for your continued feedback and enhancement recommendations!
