

Financial Technology Integrators, LLC Announces Upgrades to Investor'sView™

FTI, LLC Adds Performance Measurement, additional Reporting and Trading Functionality to Investor'sView™

Wayne, Pennsylvania, September 15, 2007 – Financial Technology Integrators, LLC announces the release of enhancements for Quarter 3, 2007 that enrich the Reporting and Regulatory Compliance within Investor'sView™. Investor'sView™ is used by over 100 firms and is a leading industry online portfolio management system that analyzes your client portfolios to: create trades using what-if scenarios; purchase and sell a single security across accounts; rebalance portfolios to investment models; generate reports or report presentation packages; and centralize compliance review procedures.

Significant enhancements include the following:

- **Administration** - Last Data Import information is now displayed within the Regulatory Compliance worksheet and Administrator Center.
- **Compliance** - Last Regulatory Review Date is now displayed within the Regulatory Compliance worksheet based on Last Review by Review Type.
- **Compliance** - Regulatory Review Month and Frequency is now displayed within the Regulatory Compliance worksheet.
- **Performance** - Account Numbers can be customized for Related Account linkage.
- **Performance** - Disclaimer information can be added to Performance Reports.
- **Reporting** – A new tool is available to quickly convert security display information to proper case.
- **Reporting** – New Report Available: Fixed Income Mutual Funds by Minor Class
- **Reporting** – S&P Weighting Report now displays the last date of update.
- **Reporting** – Upload Center now permits the uploading of mass client greeting information for mailings.
- **Trading** - Block Trade Ticket information can now be exported to Excel spreadsheet.
- **Trading** - Trade Groups based on a specific holding can be identified by Cusip or Ticker.
- **Trading** - When a new asset is added to the Security Master it is also immediately available for trading within TradeDate.

In addition there have been enhancements made 'behind the scenes' to increase the speed and efficiency of Investor'sView™ as well as to a few of our already available reports and user modules. We hope that you will find these enhancements very valuable.

Thank you for your continued feedback and enhancement recommendations!
